## OBJECTIVE

To land a position as a frontend developer so I can expand my understanding of web development and build user-friendly websites using my HTML, CSS, JavaScript, and React Js skills.

## PROJECTS

### E-commerce website

- It is an e-commerce website that uses React JS as the frontend to create a better user interface
- Tailwind CSS is used to display a better user interface
- and Redux controls the state of the application, managing functions like order booking, shopping cart management, and category-wise product administration and looking for goods
- Website:-<https://shahid-fashions-git-main-mufasir123s-projects.vercel.app/>
- Github:-<https://github.com/Mufasir123/ShahidFashions>

### APPLE WEBSITE CLONE

- Tailwind CSS is used to display a better user interface
- React JS is utilized as a frontend library
- and a UI website similar to Apple was developed.
- Animations are done with GSAP.
- Link:- <https://animation-practice-app.netlify.app/>
- Github:- <https://github.com/Mufasir123/apple-web-clone>

### Portfolio website

- Using React js as a frontend toolkit, an animated portfolio was produced, using motion animations.
- Link:- <https://mufasir-portfolio.vercel.app/>
- Github:- <https://github.com/Mufasir123/Mufasir-portfolio>

## EDUCATION

**BCA :-** Bachelor of computer application
